Platform Configuration

Your platform acts as the nerve centre for all your intelligent street lighting or smart city data. This means you're able to control an entire region of infrastructure at the simple touch of a button.

If you feel like you might need a hand configuring your platform so it works for you, our team can help.

We'll work with you to understand how you want your assets to work and perform and we'll get to work on making it happen.

This service includes:

• Setting up profiles

• Setting up groups

• Setting up entire schemes
